EDUCATION

Asia Pacific University of Technology & Innovation (APU)	Kuala Lumpur, Malaysia
Faculty of Computing	Oct 2024 - Oct 2025
Master of Science in Artificial Intelligence	CGPA: 3.4
University of Westminster	Westminster, London
Cavendish Campus	Sep 2018 - Nov 2023
Bachelor in Science in Computer Science (<i>Upper Second Class Honours</i>)	GPA: 3.6

SKILLS

Languages: Python, TypeScript, Dart, Java, PHP, C#, SQL, JavaScript, HTML/CSS

Front End: Flutter, SwiftUI, React, React Native, Tailwind CSS, Bootstrap, Tkinter

Back End: Node.js, Django, Flask, Firebase (Auth, Firestore, Storage), MongoDB, MySQL

WORK EXPERIENCE

Tactik AU	Dandenong South, Australia
<i>Web Developer (Remote)</i>	May 2021 – Dec 2022
• Developed custom websites using React and Firebase for 15 startups, enhancing online visibility by 30% and increasing lead generation by 20%.	
• Created a standardized reporting framework to support data-driven decision-making and enhance visibility into key metrics.	
the Radiant	Colombo, Sri Lanka
<i>Senior Web Developer</i>	Jan 2021 - May 2021
• Implemented a hybrid infrastructure combining AWS and on-premise resources, minimizing server downtime by 30% and achieving annual cost savings of LKR 50,000.	
• Automated invoice and contract systems using Python, slashing manual data entry errors by 80% and saving more than 100 labor hours every month.	
UniqSolutions	Colombo, Sri Lanka
<i>Junior Web Developer</i>	Aug 2020 - Oct 2020
• Developed and deployed servers for a car rental booking app utilizing PHP, SQL, and React Native, enhancing reservation efficiency by 30%.	
• Created an employee status tracker employing IoT technologies, resulting in an 80% reduction in manual tracking errors.	

PROJECTS

- Text Classification System – NLP tool for sentiment and spam detection (Python, Scikit-learn, Streamlit) - t.ly/ZaPxS.
- WhatsApp Clone – Real-time chat app with media sharing and authentication (Flutter, Firebase, Socket.io) - t.ly/mVaz0.
- Budget Buddy – Personal finance tracker with categorized budgets and real-time sync (Flutter, Firebase) - t.ly/iHETH.
- Spelling Correction System – Typo correction tool using edit distance and token-level NLP (Python, NLTK) - t.ly/LTQrd.
- Uber Clone – Ride-hailing app with live tracking and user role switching (Flutter) - t.ly/Sy7_B.
- ONCO (Contributor) – Contributed to an AI-based cancer diagnosis platform using deep learning and ML for prognosis (Flutter, Python, TensorFlow, Flask, Azure) - t.ly/9zCsw.
- Habit Ease – Track daily habits with streaks, reminders, charts, and local storage (Flutter, Hive) - t.ly/w99jg.
- WeatherAirQuality – Display real-time air quality index and weather data (Swift, Xcode) - t.ly/Alaez.
- BAWT – Behaviour Analysis with Text – NLP-based model to analyze human chat behavior and detect communication patterns (Python, Jupyter, NLP) - t.ly/l8k-8.
- TikTok Clone – A vertical video scroll app mimicking TikTok's interface with local video assets (Flutter, Dart) - t.ly/ntqBW.
- Instagram Clone – A dynamic photo feed, story viewer, and search with the Unsplash API (Flutter, Dart) - t.ly/QuP5.

AWARDS

SLIIT Datathon	July 2020
• 3rd Place - Participated in the Datathon Final Competition, representing UOW, where my team and I tackled approximately 10 algorithm questions and presented an innovative app idea, a Covid Area Recognition app.	
IIT Hackathon	April 2019
• Runner's Up - Participated in a Hackathon with my team where we had to build a site just out of pure HTML/CSS and JS.	

ADDITIONAL

- Badminton & Soccer Enthusiast | Volleyball devotee
- Avid F1 aficionado | Gamer nerd
